

Lake and College Development Burlington, Vermont

Client:

Main Street Landing Company

Location:

Burlington Waterfront, Vermont

The project represents a proposed \$14 million commercial development on a prime site at the Burlington waterfront. Salem Engineering is providing the mechanical, electrical, and fire protection engineering design for this diverse, multi-mix development. When completed, the complex will consist of an inn, small theater, two cinemas, micro-brewery and restaurant, small offices, and a parking garage.

The design of the building systems will meet the requirements of the LEED Green Building Rating System, which evaluates buildings for compliance with applicable regulations and codes for energy, IAQ, building management, and environmental standards.
